Stories from the Village of Our Ancestors

## For Mac Install

Double click the **InstallNunalleqMac.dmg** file.

Once your computer has verified the file you should see a new window with the installation.txt file and the Nunalleq Installer.

To Install drag the **Nunalleq installer to your Applications folder.**

The file will copy across and from there you can double click to launch the Nunalleq Educational Resource, have fun!

**Troubleshooting:** Generally on a Mac system, anything not downloaded from the App Store will be flagged by the system as software from an 'unidentified developer'. Don't worry, the program is perfectly legitimate and won't cause your computer any harm. You may just need to jump into your **Security & Privacy** settings and temporarily **"Allow apps downloaded from: Anywhere"** to complete the install.

## For PC Install

Double click the **InstallNunalleqWin.exe** file.

In the dialogue box check “Create a desktop shortcut” then click **Next** and **Install**.

The software will install and the icon will appear on your desktop, click **Finish** and check the box to launch the software, have fun!

**Troubleshooting:** If nothing happens when you first double click the installer, right click and select “**Run as Administrator**” and click OK to the dialogue box that appears.
